Carrier Objective

Experienced Software Engineer with expertise in [React JS & Node JS]. Passionate about problem-solving and delivering high-quality code. Seeking to contribute technical skills and collaborate on innovative projects in a dynamic organization.

Work Experience

- Software Engineer at SVIQ SOLUTION, VADODARA Jan,2025 - Present
- Jr. Software Engineer at SVIQ SOULTION, Vadodara Sept,2024 - Dec,2024
- Intern at Dakshya Freondtech, Ahmedabad 5 months

Technical Skills

- Logical Expert
- HTML, Tailwind CSS, JS
- NodeJS
- React JS
- Express JS
- MYSQL
- MSSQL
- MONGODB
- Postman
- GIT & GITHUB, BITBUCKET
- Docker
- Linux

Education Background

- **Dharmsinh Desai University, Nadiad**
Master of Computer Application
Completed in 2024
CGPA - 7.41
- **Maharaja Sayaji Rao University, Baroda**
Bachelor of Science in Mathematics
Completed in 2022
CGPA - 6.11

SVIQ SOLUTION Projects

• **VIZTRACK (VISITOR MANAGEMENT SYSTEM) (REACTJS & NODEJS)**

The Visitor Management System is designed to streamline the check-in process, enhance security, and improve the overall visitor experience. With a user-friendly interface and powerful features, this system allows businesses, offices, and organizations to efficiently manage visitor access and ensure smooth operations.

Key Features:

- **WhatsApp Integration:** Seamlessly communicate with visitors through WhatsApp, sending instant notifications about appointments, entry approvals, and visitor status updates. This adds an extra layer of convenience and ensures real-time communication.
- **Live Image Capture:** Capture and store live images of visitors during check-in for enhanced security and identification. This feature helps create digital records for auditing or safety purposes.
- **Customizable Visitor Registration:** Visitors can register quickly through a simple form, which can be customized to gather relevant information such as name, purpose of visit, and expected time of arrival.
- **QR Code-Based Check-In:** Simplify the check-in process with QR code scanning. Visitors can receive QR codes for entry via email or WhatsApp, ensuring a fast, contactless check-in experience.
- **Real-Time Monitoring and Reporting:** Track and monitor visitor activity in real-time, with detailed logs and reports that offer insights into visitor trends, peak times, and more.
- **Visitor Scheduling & Email Notifications:** Schedule visits in advance, and send automated email notifications to visitors with appointment details, entry approvals, and updates. This feature ensures visitors are well-informed and prepared for their visit.

• **CHAI COFFEE MANAGEMENT (REACTJS & NODEJS)**

Developed a dynamic Chai and Coffee Management System using React for the front-end and Node.js for the back-end. This system allows businesses (cafes, restaurants, or tea/coffee stalls) to efficiently track and manage daily sales of chai and coffee, providing automated calculations and monthly billing.

Key Features:

- **Day-to-Day Tracking:** Tracks the daily count of chai and coffee sold, with real-time updates.
- **Automated Billing:** At the end of each month, the system automatically generates a detailed bill summarizing the total chai and coffee sold and the corresponding revenue.
- **User-Friendly Interface:** The system includes a clean and responsive interface built with React, ensuring ease of use for operators to log daily sales.
- **Backend Integration:** Node.js handles data storage, processing, and ensures smooth integration with the front-end, enabling seamless updates and reporting.
- **Database Management:** Utilized MongoDB (or your preferred database) for storing sales data and generating month-end reports.

SYNKRON - CLOVER INTEGRATION (Internship)

- Synkron makes multi-channel inventory management easy by automatically synchronizing your inventory across all sales channels and keeps track of every unit efficiently.
- Effortlessly Sync your Inventory with Inventory Management Software
- Features added: Auto Sync, Inventory History, Inventory Analytics, Source of truth, Never Oversell
- Tools: JDK 11, Spring boot
